“At SKYPRO we are passionate about creating products that genuinely deliver happiness and comfort to professionals around the world”.

Our priority is guaranteeing professionals are safe and comfortable throughout their work life.

Helping ensure their skin stays dry and protected through the day, keeping their spine & joints from suffering unnecessary impact, preventing slips & falls and maintaining a comfortable body temperature all whilst ensuring an impeccable look for the brand.

Our products were developed in partnership with third party shoe and textile researchers such as CITEVE to guarantee workers have the best materials and technologies suited to their daily needs.

Men Clothing

Made from hypoallergenic fabrics and developed
for easy care and comfort

Full protection and safety for your intense work life.

Hipo-Alergenic

By using a high percentage of natural fibers our products are ideal for anyone with a tendency to allergic reactions.

Easy Cleaning

By improving repellent characteristics of the surface of our fabrics, using carefully selected, top of the line technology, allows for easy removal of stains. With this finishing the drying properties of the fabric are improved and we guarantee a much more durable garment.

Easy Care & Comfort

SKYPRO products are produced with fabrics that have been processed with a special high-tech finish to ensure a soft, smooth and clean appearance. This minimizes wrinkling and garments look newer for longer, retaining their shape and original dimensions after washing. Our durable super-soft finish provides the highest comfort.

Thermodynamic Care

Nitrile rubber sole with specific groove orientation for improved ground/shoe interaction.

Anti-Pilling

Our textiles are treated during the manufacturing process in order to reduce their propensity to pilling.

Anti-Odor

Anti-odor technology captures odor molecules and keeps products smelling fresh. Unpleasant odors are kept under control and professionals will stay fresh throughout daily activities.

Soil & Stain Release

By improving stain release during the cleaning process and by reducing fabric's absorption of soil & stain our fabrics remain breathable and comfortable preserving their initial qualities, feel, and appearance.

Fast Dry

Our fabrics dry quickly due to reduced water absorption. This enhances the comfort level of the garment.

Easy Iron

By improving repellent characteristics of the surface of our fabrics, using carefully selected, top of the line, technology, allows for easy removal of stains. With this finish the drying properties of the fabric are improved and we guarantee a much more durable garment.

Breathable

The level of breathability is an essential contributing property to thermal and physiological comfort of our garments. Our fabrics have the ability to allow moisture vapour to pass through them hence providing comfort all day long.

UV Protection

This high-tech finish helps to block the majority of UV rays whilst keeping the fabric breathable and soft.

My Skin

MySkin technology feels just like a second skin because it adapts to your body, giving you more comfort. The thread is thinner, so the fabric is more elastic and it doesn't lose its shape in the wash.

KNITWEAR

Empire State

The SKYPRO zip-front Empire State cardigan uses a supreme blend of 50% merino wool to ensure softness to the touch and the highest comfort. The funnel neck, waist and cuff ribbed-knit finishing ensures a stylish, perfect fit. The cardigan has button fastening epaulette flaps to be an integral part of any uniform. Designed for pilots, the cardigan's concealed zip completes the overall impression of precision. The Empire State pilot's cardigan is elegant, comfortable and attractive.
