“At SKYPRO we are passionate about creating products that genuinely deliver happiness and comfort to professionals around the world.”

Our priority is guaranteeing professionals are safe and comfortable throughout their work life.

Helping ensure their skin stays dry and protected through the day, keeping their spine & joints from suffering unnecessary impact, preventing slips & falls and maintaining a comfortable body temperature all whilst ensuring an impeccable look for the brand.

Our products were developed in partnership with third party shoe and textile researchers such as CITEVE to guarantee workers have the best materials and technologies suited to their daily needs

A close-up photograph of a woman's legs from the knees down, wearing light blue, pointed-toe pumps with thick, blocky heels. She is standing on a treadmill, with the black textured belt and silver metal frame visible. The background is blurred, showing more of the gym equipment.

# Women Shoes

All styles are alarm-free, and have an anti-skid nitrile rubber sole and ambicork midsole for thermal comfort.

# Full protection and safety for your intense work life.

## **Impact Reduction**

# Women Clothing

Made from hypoallergenic fabrics and developed for easy care and comfort

# Full protection and safety for your intense work life.

## Hipo-Alergenic

By using a high percentage of natural fibers our products are ideal for anyone with a tendency to allergic reactions.

## Easy Cleaning

By improving repellent characteristics of the surface of our fabrics, using carefully selected, top of the line technology, allows for easy removal of stains. With this finishing the drying properties of the fabric are improved and we guarantee a much more durable garment.

## Easy Care & Comfort

SKYPRO products are produced with fabrics that have been processed with a special high-tech finish to ensure a soft, smooth and clean appearance. This minimizes wrinkling and garments look newer for longer, retaining their shape and original dimensions after washing. Our durable super-soft finish provides the highest comfort.

## Thermodynamic Care

Nitrile rubber sole with specific groove orientation for improved ground/shoe interaction.

## Anti-Pilling

Our textiles are treated during the manufacturing process in order to reduce their propensity to pilling.

## Anti-Odor

Anti-odor technology captures odor molecules and keeps products smelling fresh. Unpleasant odors are kept under control and professionals will stay fresh throughout daily activities.

## Soil & Stain Release

By improving stain release during the cleaning process and by reducing fabric's absorption of soil & stain our fabrics remain breathable and comfortable preserving their initial qualities, feel, and appearance.

## Fast Dry

Our fabrics dry quickly due to reduced water absorption. This enhances the comfort level of the garment.

## Easy Iron

By improving repellent characteristics of the surface of our fabrics, using carefully selected, top of the line, technology, allows for easy removal of stains. With this finish the drying properties of the fabric are improved and we guarantee a much more durable garment.

## Breathable

The level of breathability is an essential contributing property to thermal and physiological comfort of our garments. Our fabrics have the ability to allow moisture vapour to pass through them hence providing comfort all day long.

## UV Protection

This high-tech finish helps to block the majority of UV rays whilst keeping the fabric breathable and soft.

## My Skin

MySkin technology feels just like a second skin because it adapts to your body, giving you more comfort. The thread is thinner, so the fabric is more elastic and it doesn't lose its shape in the wash.

UNDERWEAR

Thermal Sense

# Long Sleeve

This winter undershirt protects you from the cold whilst maintaining your natural body temperature by moving perspiration to the exterior. It is highly recommended for professionals who spend long periods of time working on their feet. Employing the latest technology in thermal wear, the body is allowed to breathe and naturally regulates its own temperature, protecting you and producing a sensation of wellbeing that lasts. The perfect fit of this undershirt is guaranteed by using elastane in its composition. Besides being a high-tech, high-performance fibre, it has a natural feel similar to cotton.

SOCKS

Unisex  
Polyamide & Cotton Socks

# Compression Socks

These graduated class I Compression Socks for men and women are manufactured in accordance with European Standards. With compression levels from 15 to 21mmHg, they increase blood flow in the legs, reduce the feeling of heavy legs, swelling and pain and help prevent the risk of DVT (Deep Vein Thrombosis - known as Economy Class Syndrome). Clinically tested, they are indispensable for the everyday comfort of anyone who spends long periods of time on their feet. Knitted in 100% polyamide, a versatile and hard wearing fibre using the latest double cylinder technology.
